

Flux 2022 Pre-conference workshop

***The Developmental Neuroscience Cycle:
from Research Design to Societal Impact***

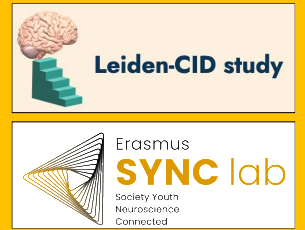

Afternoon session: Societal Impact

Today's Goal

- Share your passion for Developmental Science
- Get inspired to make Societal Impact

- Brainstorm
 1. Create ideas for Societal Impact
 2. Concretize ideas for Societal Impact
 - Collect our needs from mentors/universities/flux to achieve societal impact

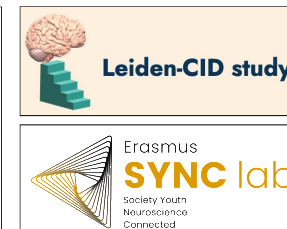

Societal Outreach

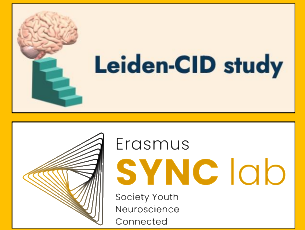

- From Science to Society
- Share scientific knowledge, insights and opinions to wider audiences
- Blogs / Vlogs
- Video's
- Public lectures
- Public articles
- School curriculum
- Public Science Events
- ..

Societal outreach:

Keep the Audience in Mind

- Children, Adolescents, Parents, Teachers, Clinicians, Policy makers
- Adjust to your audience and their context/knowledge
- Use simple, common language
- Visuals!
- Attention span: Pick one finding or take-home message

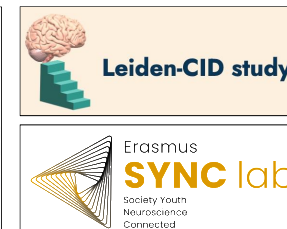

Co-creation

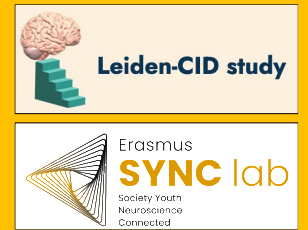

- From Society to Science
- Use societal knowledge, insights and opinions for your research
- Online polls
- Brainstorms
- Co-evaluation
- Youth panels
- Involving stakeholders (schools, municipalities)
- ..

Co-creation:

Keep the Informant in Mind

- Children, Adolescents, Parents, Teachers, Clinicians, Policy makers
- Different informants = different interests/ agenda's
- Don't just listen to their contributions – use it!
- Provide feedback on what they said and how it is used
- You don't have to use everything, keep a balance

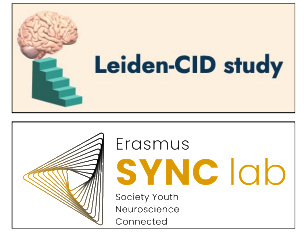

Citizen Science

- Society = Science
 - New innovative ideas and concepts are developed and tested in **real-life situations** together with social partners and citizens
-
- 1) Anyone can participate!
 - 2) Participants use the same protocol so data can be combined
 - 3) Data can help real scientists come to real conclusions
 - 4) A wide community of scientists and volunteers work together

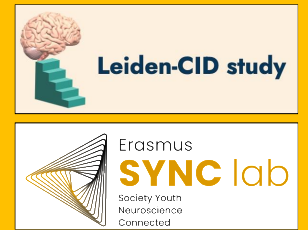

Citizen Science:

Keep the Limitations in Mind

Pro's	Measurement level:	Con's
Ecological validity	Citizen Science	Controlled analyses
Novel perspectives	Brain Imaging	Generalizability
Controlled analyses	Experiments	Ecological validity
Generalizability	Questionnaires	Novel perspectives

Credit: Eveline Crone

Developmental Science in Policy

- Providing breakfast for lower income children
- Juvenile Criminal Law
- Changing school times for Adolescents
- Social activities during COVID-19 lockdowns
- ...
- ...
- ...

“It is the greatest of all mistakes to do nothing because you can only do little.”

—Sydney Smith—

JUST
DO IT!

Expedition Next

Lina van Drunen (L-CID and SYNClab)

Who are we?

communication/agenda

Expedition Next
Festival

Expedition NEXT - Science Festival

6000 children

Get children (and their parents) excited about science and spark their curiosity

SYNC lab & Expedition Next

Self-concept:
discover your superpower

The voice of children

Dance your brain in
SYNC!

Goal outreach

“To us, societal impact is investing in creative ways to engage the future generation in science, sparking their curiosity, feeding their critical mind, and really listening to them”

Challenges & Lessons learned

1.

Be clear about
roles and
responsibilities

2.

Leave room for
improvisation
and creativity

3.

Be realistic and
place yourself in
the shoes of the
target audience

communication/agenda**

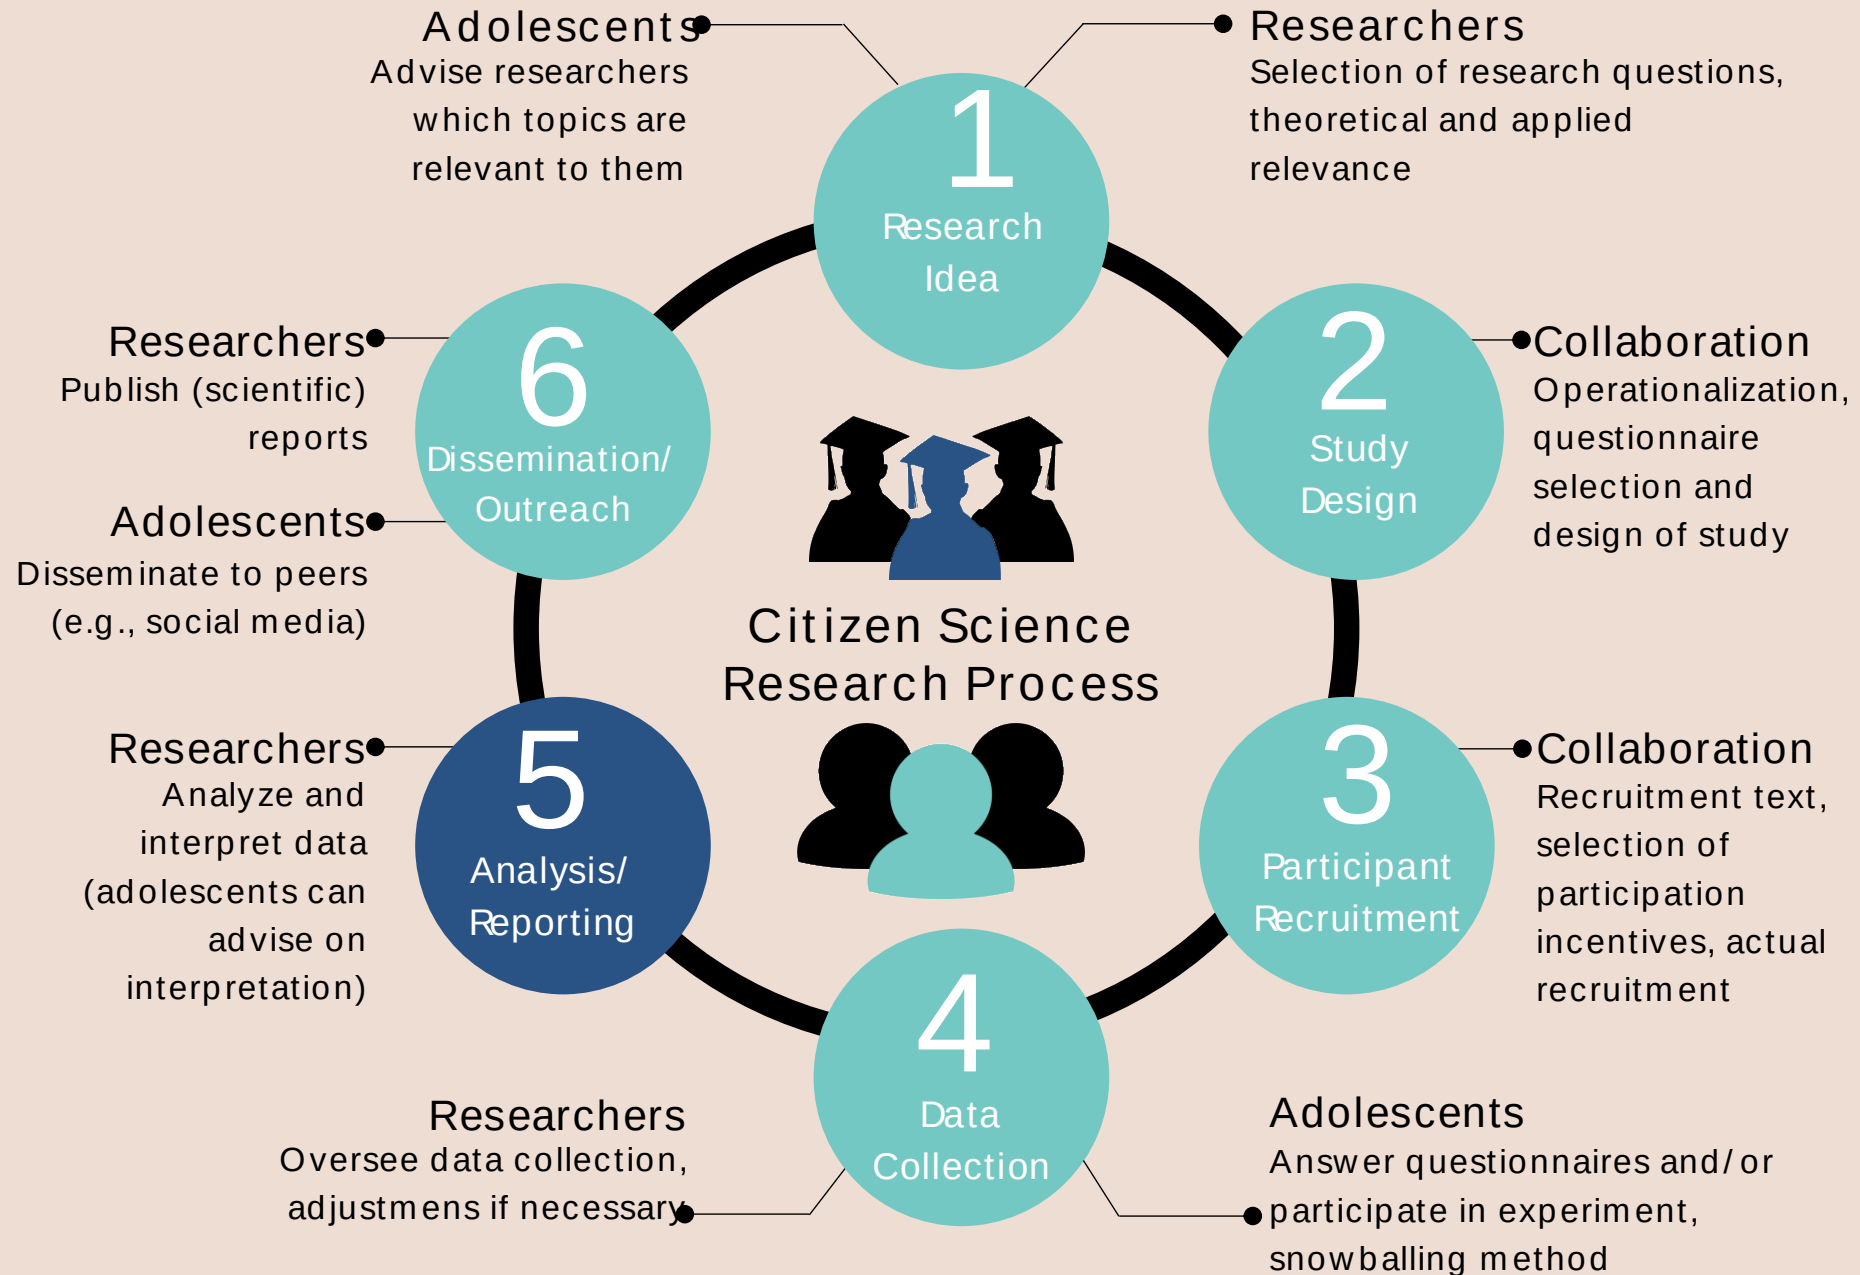

From Society to Lab

From lab to society

From society to lab

- Co-creation
- Co-exploration
- Co-experimentation
- Co-evaluation

DEVELOPMENT OF THE PLATFORM

The Facts

Themes:

- Creativity
- Wellbeing
- Resilience
- Drive
- Contribution

Take Action

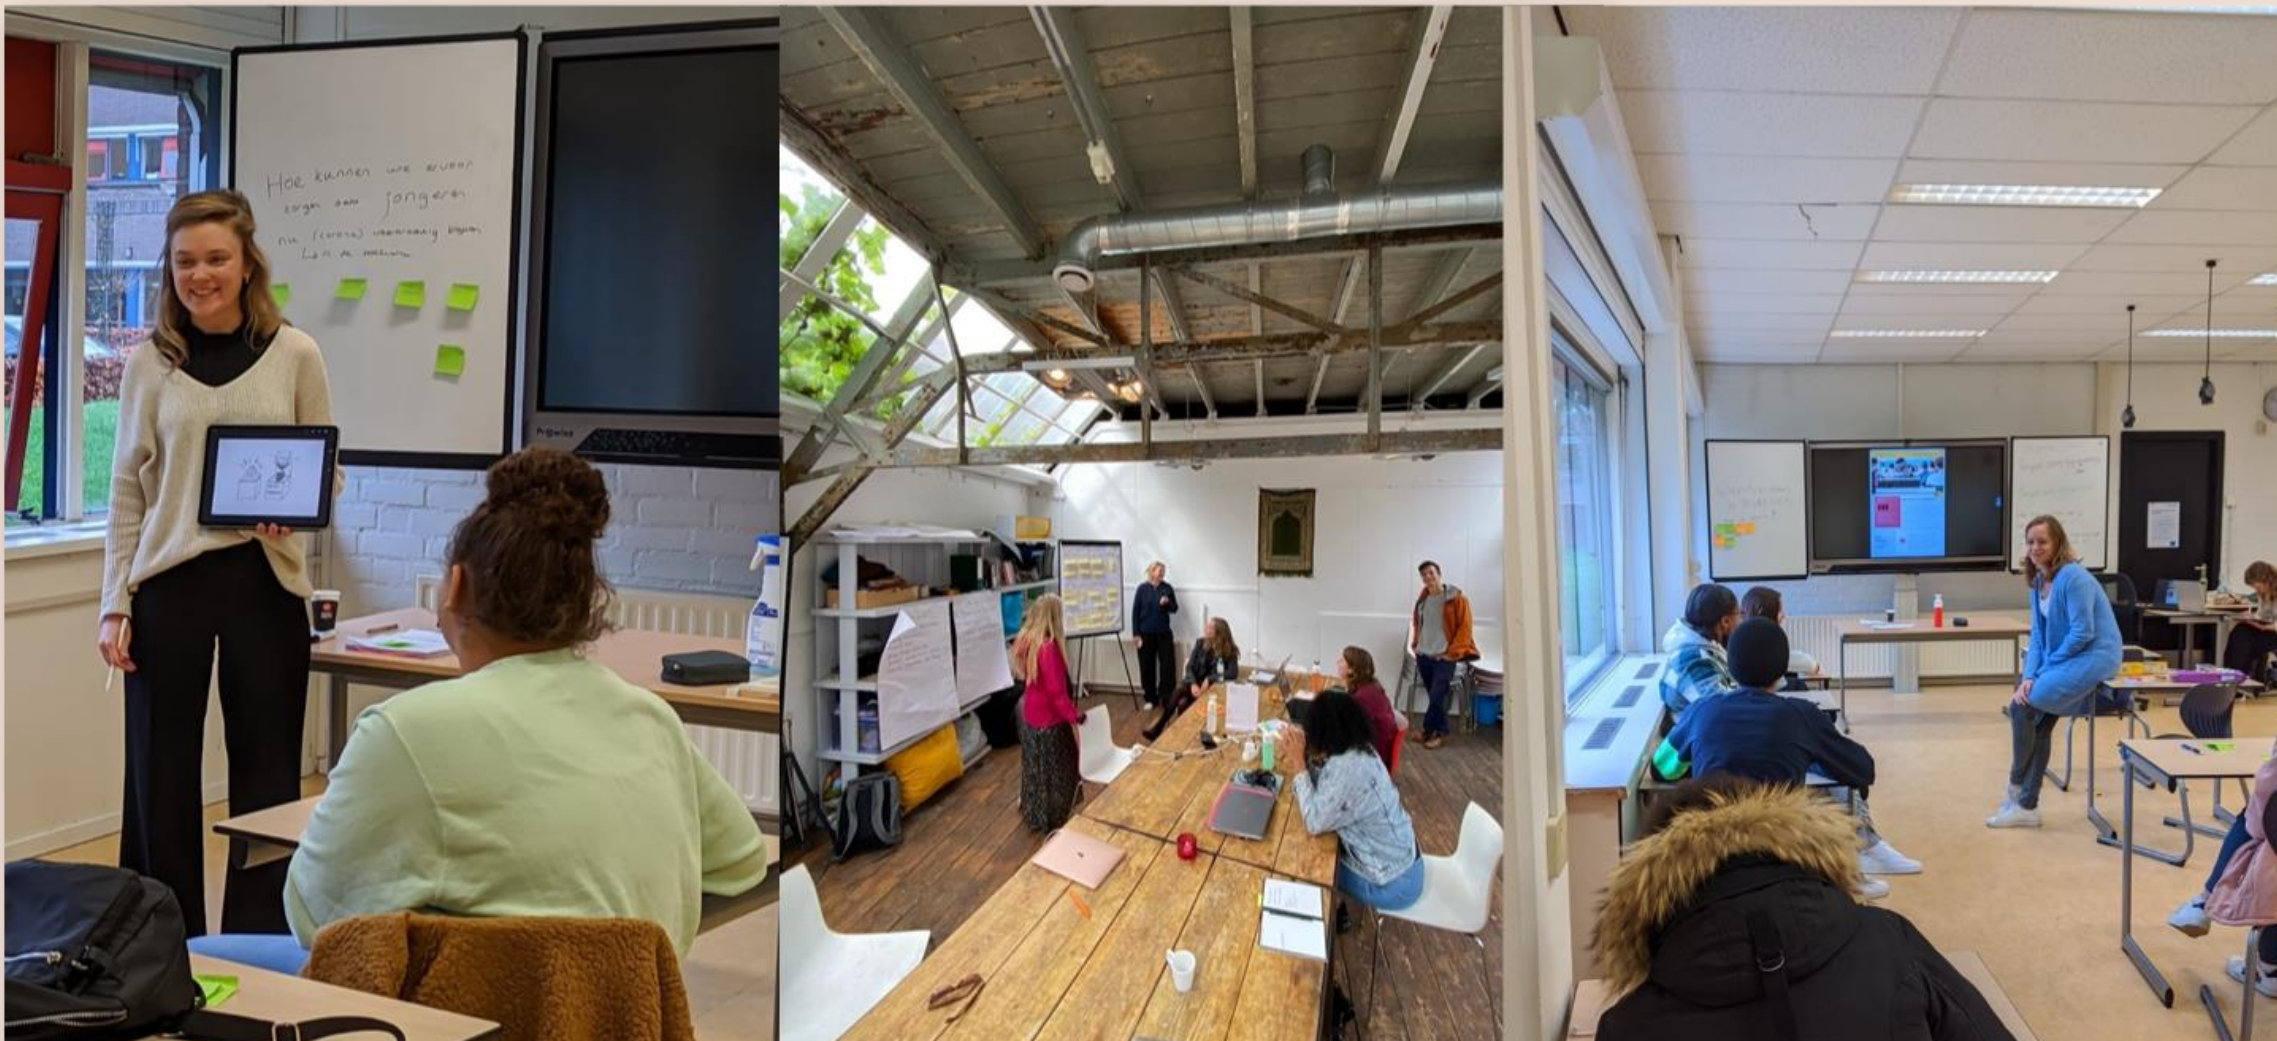

Panel sessions with:

- Youth in Rotterdam
- Social workers
- Policy Makers
- Coalition-Y
- Students

That's why we think it's very important
to also ask their opinions.

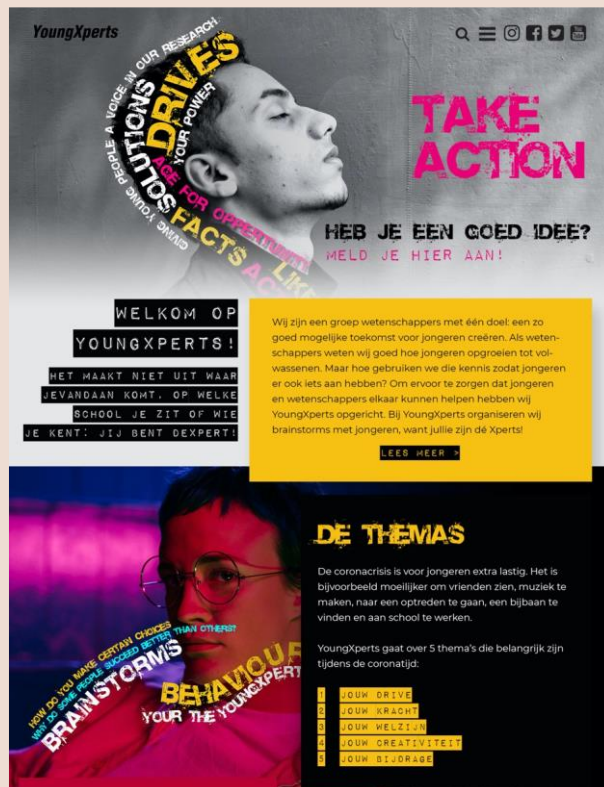

TAKE ACTION

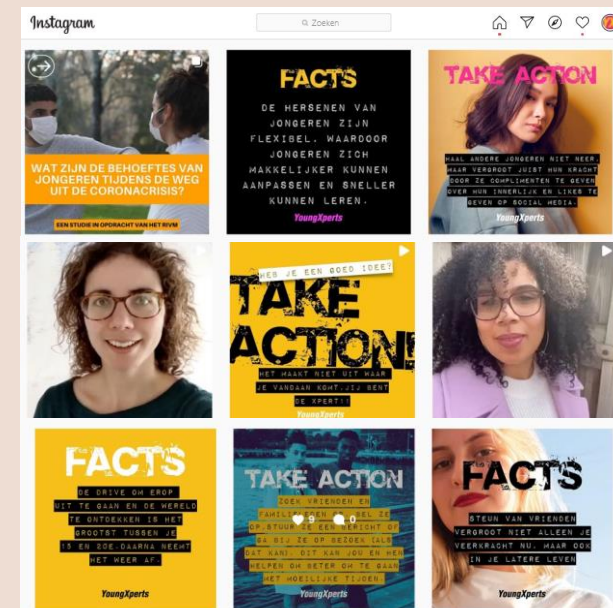

TAKE ACTION

CHALLENGES

- Developing a network of youth and youthworkers takes time (effort!)
- Flexibility is needed!

TIPS

- Start small
- Keep GOAL in mind
- Reach adolescents through key-figures
- Use engaging methods
- Provide compensation
- Let adolescents know what you do with their input

All schools (collect) together

Different perspectives

Study in short

Research question

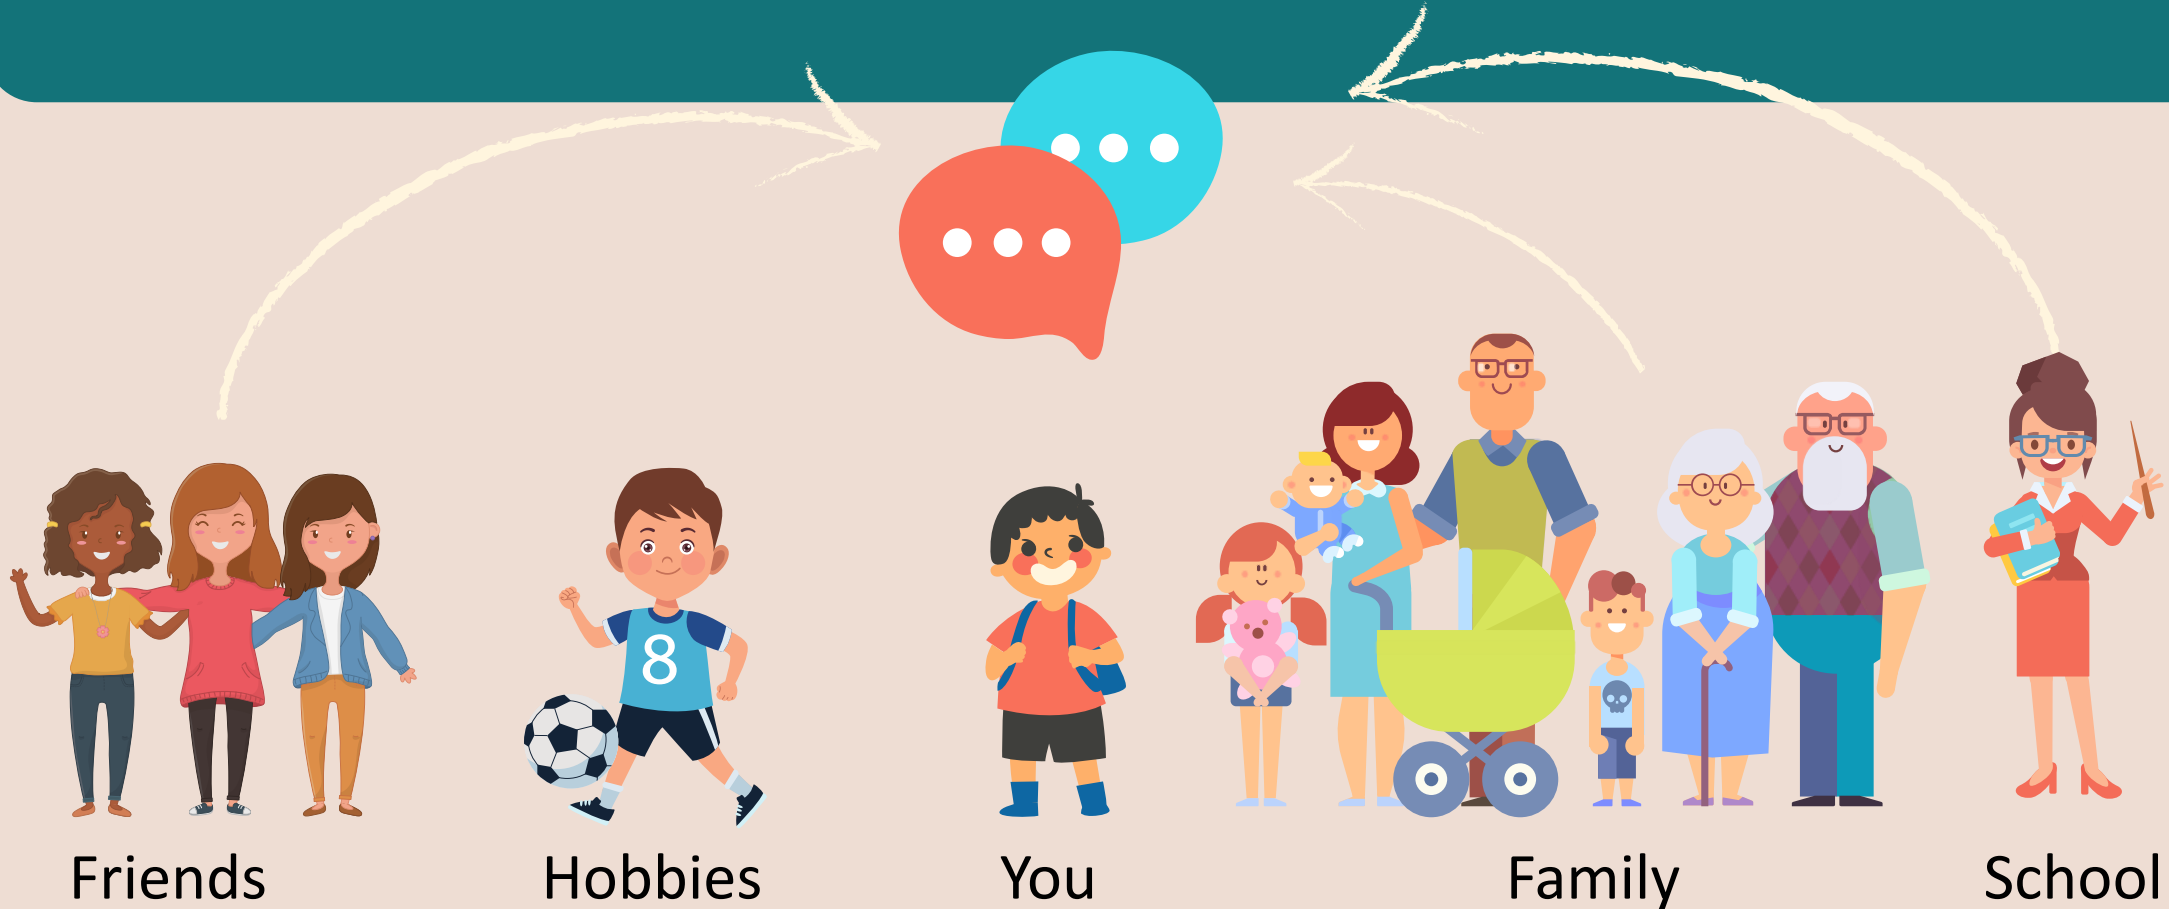

Do people who influence our social environment find the same things important for our social environment as we do?

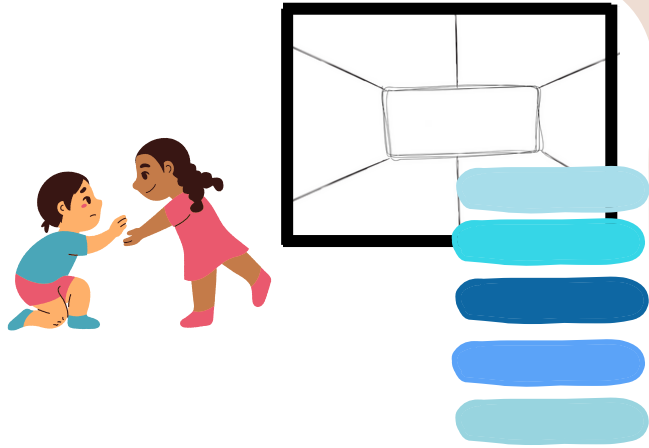

Goals

- Make the voices of children heard
- Enthuse children for science
- Contribute to the development of children into critical citizens
- Introduce children to the research cycle

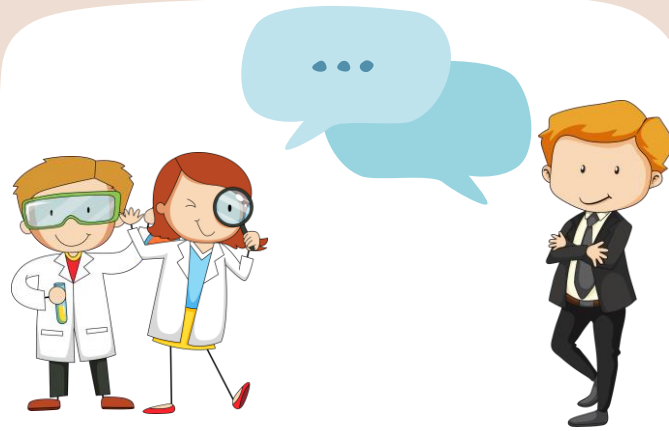

Social environment

What does the study look like?

Introductory
classes to prepare

Interview key
figure

Process data and
visualize results

Research question

Are the voices of children being heard when it comes to what they find important in their social environment?

Differences between environments

Effect of urbanicity and SES

Challenges & Lessons learned (so far)

Collaborating with an institution: helpful but different timeline

Experience with recruitment/ practical issues

Research topics

Start thinking about citizen science approaches now!

Co-create with stakeholders/teachers

You don't have to reinvent the wheel
